

Lab Tasks on if-else

Task 1: Write a C program to check whether a given number is positive or negative.

Sample Input:

Enter a number: 5

Expected Output:

The number is positive.

Task 2: Write a C program to check whether a given number is even or odd.

Sample Input:

Enter a number: 12

Expected Output:

12 is even.

Task 3: Write a C program to print the grade based on marks:

- 90–100: A
- 80–89: B
- 70–79: C
- 60–69: D
- Below 60: F

Sample Input:

Enter your marks: 85

Expected Output:

Grade: B

Task 4: Write a C program to find the maximum among three user-input numbers.

Sample Input:

Enter three numbers: 5 -1 8

Expected Output:

The maximum number among three is 8

Task 4: Write a C program to find the maximum among three user-input numbers.

Sample Input:

Enter three numbers: 5 -1 8

Expected Output:

The maximum number among three is 8

Task 5: Write a C program to perform basic arithmetic operations using switch-case.
Supported operations: +, -, *, /

Sample Input:

Enter two numbers: 10 5

Enter operator (+, -, *, /): *

Expected Output:

Result: 10 * 5 = 50

Task 6: Write a C program that takes an integer (1–7) and prints the corresponding day of the week.

Sample Input:

Enter a number (1-7): 3

Expected Output:

Monday
